

TriTagIT

Active Tag - T311

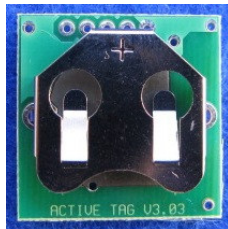

Applications:

- Asset Tracking (Laptop & Small Assets)

Construction:

- The Tag is small enough to fit in a Laptop Computer.
- A conformal coating protects the Tag from water and other harmful gases and fluids.

Dimensions: 30mm X 30mm X 10mm.

T300 in PVC housing → T311

Installation:

- The Tag is designed to fit into any required housing or can be fitted as is e.g. in a Laptop with a wire Antenna

Battery:

- The Tag has a battery life of >4yrs, (3 sec average speed TX).
- The battery is replaceable. The battery is tested every 24hrs and a low battery warning is sent to the Reader.

Range:

- The Tag in combination with the standard receiver has an effective range of 15 meter in diameter, 30 meter with antenna. (Under ideal conditions)

Unique codes:

- Capable of 4.18 Million different codes

Environmental Specification:

- Ideal in all weather conditions, between -10°C to +70°C.

Transmission:

- 16 random transmission intervals ensure Anti-collision of Tag data.
