## Active Tag - T312-T

### Applications:

- Asset Tracking, aesthetically pleasing housing, ideal for external Laptop mounting. This model has anti-tamper warning.

### Construction:

Dimensions: 84x54x12mm thick.

### Installation:

- Supplied with anti-tamper circuit, magnet & double sided tape flush mounting.

### Operation:

- In addition to the unique code, and low battery warning, a Tamper signal will be sent when the magnet moves away from the sensing circuit, usually caused by removing the Tag from its surface. The Tag transmits in high power mode during Tamper.

### Battery:

- The Tag has a battery life of >3yrs, (3 sec average speed TX).
- The battery is replaceable. The battery is tested every 24hrs and a low battery warning is sent to the Reader.

### Range:

- The Tag in combination with the standard receiver has an effective range of 15 meter in diameter, 30 meter with antenna. Range is >80 meters in Tamper (Under ideal conditions).

### Unique codes:

- Capable of 4.18 Million different codes

### Environmental Specification:

- Ideal in all weather conditions, between -10°C to +70°C.

### Anti-collision:

- 16 random transmission intervals ensure Anti-collision of Tag data.
